BIBLIOGRAPHY

XX^e Bibliographie Géographique Annuelle 1910. Publiée sous la direction de Louis Raveneau. *Annales de Géographie*, Vol. 20, 1911, No. 113. 336 pp. Index. Armand Colin, Paris. 5 fr.

This annual publication established its reputation from the first as conceived on an admirable plan giving it special utility. From the great output of geographical books and papers in each year are selected for notice those that seem to the editor and his collaborators to be of particular value and usefulness. The selections are almost invariably made with much discernment, and the compilation is a good index to the best geographical literary products of the year. Critical or descriptive notes are added to each title. The editor has the collaboration in the present volume of fifty-eight assistants. There are 1,165 notes, a few of them including several titles. A number of maps are noted, and many geographers would undoubtedly welcome a small enlargement of the annual to include all the most notable map products of the year.
